

# ROAD WORK AHEAD

**The City of Dublin** is contracting for pavement maintenance work to be performed in your neighborhood beginning in October 2009. The list of streets on which this work will take place is on the reverse side of this notice. Although your street might not be listed, you may be receiving this notice because you live close to where the work will take place and access to and from your home or business might be affected.

The pavement work scheduled will be a slurry seal resurfacing. Slurry seal is a sand/oil mixture which is used to extend the life of the street. There will be more definite information as to work days and times as the project time gets closer.

## **How will this work affect you as a business or a resident?**

**Parking:** While the work is in progress, the City's contractor may need to prohibit parking on the street. **The contractor will be posting "No Parking" signs a minimum of 72 hours (3 days) in advance of the scheduled work on your street.** Please be aware that, due to the possibility of unforeseen circumstances such as equipment breakdowns, the posted dates and times could change. You may continue to park on the street until the date and time shown on the signs. We appreciate your cooperation in obeying these No Parking signs. If you are planning to be out of town during the time that the work is taking place, please arrange to park off the street to avoid having your vehicle(s) towed.

**Driving on the Street:** During the repair portion of the work, we will make every effort to keep streets open and allow you to get in and out of your driveway. If the contractor is working directly in front of your house, there may be periods of time that your access will be blocked by trucks and equipment. Again, you will have at least three days advance notice before the work actually occurs, and we would respectfully request that you plan accordingly.

During the slurry seal process, your street **may be closed to vehicular traffic** for a period of several hours to allow the material to dry.

**If you have a special need:** Please contact Melissa Morton in the Public Works Department. The City Inspector and the contractor are more than willing to work with you. Advance notice is appreciated whenever possible.

If you have any further questions regarding the street resurfacing work, please call the Public Works Department at (925) 833-6630.

Thank you for your cooperation.
